CAREER OBJECTIVE

Full Stack Developer skilled in role-based auth, real-time WebSocket features, and scalable REST APIs with React front-ends. Seeking a Full Stack position to build clean, maintainable, production-ready applications.

SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React, Next.js, Tailwind CSS, Framer Motion, CSS3, HTML5

Backend: Node.js, Express.js, REST API

Database/ORM: MongoDB, PostgreSQL, Prisma

State/Data: Redux, TanStack Query, Pusher (WebSockets)

Auth/Payments: JWT, Firebase Auth, Better Auth, Stripe

AI-Assisted : Using AI tools (ChatGPT/Claude/Copilot,Gemini) to accelerate feature implementation, API integration

Tools: Git, GitHub, Figma, Vercel, Netlify, CI/CD

PROJECT

1. LMS Platform [Liv-Link](#) | [Source Code](#)

Overview: Full-stack Learning Management System.

- Developed Learner & Admin portals with real-time tracking, live support, and certificate generation.
- Integrated bKash & Nagad payment gateways for automated order verification and secure checkout.
- Built a searchable course catalog with quizzes, assignments, and a Gemini-powered AI assistant

Tech Stack: Next.js 15, React 19, TypeScript, PostgreSQL, Prisma, Tailwind CSS v4, React Query, shadcn/ui.

2. ShifaCare – Medical Management [Live-Link](#) | [Source Code](#)

Overview: Full-stack healthcare platform optimizing clinical workflows and role-based privileges.

- **Role Management:** Built secure multi-role access (Admin/Doctor/Patient) using **BetterAuth** with structurally locked administrative accounts.
- **Real-Time Chat:** Reduced message latency using Pusher WebSockets + TanStack Query, enabling real-time updates without page refresh
- **Database & QA:** Optimized **MongoDB** native connection pooling for serverless environments and engineered a quick-access demo panel.
- **Tech Stack:** Next.js, TypeScript, MongoDB, Pusher API, BetterAuth, Tailwind CSS, Framer Motion

3 E-Commerce Management App [Live Link](#) | [Client](#) | [Server](#)

Overview: Full-stack retail platform.

- Integrated Stripe Payment and Firebase authentication for secure user transactions.
- Built an Admin Dashboard for real-time inventory and order management.
- Implemented advanced product catalog with dynamic filtering and sorting.

Tech Stack: React.js, Node.js, MongoDB, Stripe.

CERTIFICATION & EDUCATION

Barguna National University , Bachelor of Honours (Session: 2028)

Complete Web Development (MERN Stack) – Programming Hero [Certificate](#)

LANGUAGE PROFICIENCY: Bengali: Native English: Intermediate
